Second Announcement

INTERNATIONAL CONFERENCE

on

Sustainability of Smallholder Agriculture in Developing Countries under Changing Climatic Scenario

14-17 February 2018, Kanpur, India

Organized under the joint auspices of

The Society of Agricultural
Professionals, Kanpur,
India

Chandra Shekhar Azad
University of Agriculture & Technology
Kanpur, India

In collaboration with

PREAMBLE

More than half of the world's population is engaged in agriculture and majority of the farmland in sub-Saharan Africa and Asia is managed by smallholders. Though, smallholders contribute significantly to the food supply in these countries, low investment in agriculture coupled with shrinking area of arable land, receding natural resources, rising input price etc have left smallholders more vulnerable to hovering adversities of climate change.

It has, therefore, become inevitable to have a dialogue among the researchers across the disciplines and sectors of farming to evolve the globally acceptable guidelines and framework for addressing the issues related to sustainability of smallholder agriculture in developing countries, especially in the changing climatic regime. In this backdrop, Chandra Shekhar Azad University of Agriculture & Technology, Kanpur in collaboration with The Society of Agricultural Professionals, Kanpur and Indian Council of Agricultural Research, New Delhi is organizing an International Conference on Sustainability of Smallholder Agriculture in Developing Countries under Changing Climatic Scenario at the University Campus, Kanpur (India) during 14-17 February 2018.

THEME

1. Smallholder Agriculture: Perspective

- Enduring hunger in Africa
- Combating hidden hunger and protein malnutrition in Asia
- Agrarian reforms in Central America
- Improving livelihood security in Caribbean region

2. Conservation and Utilization of Genetic Resources

- Sustainable management of plant genetic resources
- Pre-breeding efforts for improving germplasm
- Improving breeding efficiency
- Genetic improvement for managing biotic and abiotic stresses

3. Natural Resource Management for Ecological Security

- Water management, improving water use efficiency & water budgeting
- Conservation agriculture • Soil health
- Management of farm residue and agro-industry waste
- Non-conventional energy sources

4. Managing Farm Inputs for Higher Productivity

- Agro-chemicals • Bio-fertilizers
- Biorationals • Mechanization for small farms

5. Managing Change in Agriculture

- Mitigation of climate change and carbon sequestration
- Precision farming, GIS & remote sensing and digital agriculture
- Organic cultivation
- Agri-business promotion: *Sugar industry, Potato crop, Rubber & Plantation crops, Spices, Medicinal & Aromatic plants, Agro-processing*

6. Sustainable Farming Systems

- Crop diversification and intensification, Integrated farming systems
- Livestock management including small ruminants
- Fruits and vegetable production
- Agro-forestry and landscape management
- Poultry and fishery production system
- Small scale agro-based entrepreneurship

7. Social Dynamics and Policy Support

- Farmer's innovations (ITK & participatory technology development)
- Post harvest technologies, Value chain management and Marketing
- Emerging social changes towards agriculture
- Policy imperatives • Social sciences

PRESENTATIONS

There will be following categories of presentations:

- Plenary Lectures • Invited Papers
- Contributory Oral Presentations • Interactive Sessions
