CHANDRA SHEKHAR AZAD UNIVERSITY OF AGRICULTURE & TECHNOLOGY KANPUR-208002

For registration

About The Institution

C. S. Azad University of Agriculture and Technology, Kanpur is the leading agricultural institution of the country and having strong foundation laid as early 1893. This institution continued its journey in independent India attaining its present status of university after several stages of metamorphosis- from the School of Agriculture in 1893 to status of university in March 1975. The University serving the nation since last 114 year through research, education and development of technologies for farmer of the country. The University has mandate of planning, execution, monitoring, co-ordination, evaluation and impact assessment of research programmes across the faculties to cater the research need of South-Western Semi-Arid and Central Plain zones covering 22 districts of Uttar Pradesh with its seven colleges in which four college (Agriculture, Horticulture, Agroforestry and Home Science) are located at university HQ (Kanpur) and three colleges (Fisheries, Dairy Technology and Agricultural Engineering) at Etawah campus. A second college of Agriculture is also established at Lakhimpur Kheri, Uttar Pradesh. As the mother of several ICAR institutions, Chandra Shekhar Azad University of Agriculture and Technology, Kanpur continues to serve as the leading organization for agricultural studies, research and extension in the country.

About the Project

The Centre for Advanced Agricultural Science and Technology on Nutritional Crops is the World Bank funded project, implemented by Government of India through National Agricultural Higher Education Project-Indian Council of Agricultural Research, New Delhi. This project seeks to establish partnership with national/international/private organizations and scaling of capacity building of postgraduate students as well as faculties for enhancing their research and teaching capabilities. The project aim is to promote production-oriented research as a way to enhance productivity and ensuring the prosperity of rural communities and developing knowledge centre for quality seed production of nutritional crops.

About the Training

Every postgraduate student at the universities and other higher institutions of India has to make a research project as one of the requirements for completing their degree programmes. However, most of postgraduate students of Indian universities/institutions facing challenges in their research writing process due to lack of the research ethics and writing skills. Moreover, UGC guideline 2019 envisaged as mandatory requirement to publish a minimum of two papers in NAAS rated journal for awarding Ph.D. degree. It is also disappointing to see a researcher who consume a lot of time and effort in conducting their research work, often failed to publish his research work in reputed high impact journal based on styling or linguistic errors or research ethics despite its high scientific merit of research.

The requirement for writing a thesis or dissertation before completion of Master or Ph.D. degree is set at the universities and other higher learning institutions so that the students may improve their research information searching, organizing, evaluation and self-expression skills. Before the writing of thesis and research paper, it is necessary to postgraduate students to know about the research ethics. Research ethics involves the application of fundamental ethical principles to a variety of topics involving research, including regulation of research, scientific honesty, carefulness, intellectual freedom, openness, the principles of credit, the principles of public responsibility and scientific misconduct (such as fraud, fabrication of data and plagiarism), whistle blowing also included. Whether a post graduate student or budding scientist just started their career or are a more seasoned researcher, it is essential to aware about the importance of ethical conduct. To increase the awareness of the postgraduate students in research ethics, a compulsory course on research methodology have already been design by many agriculture universities as envisaged under UGC regulation 2016.

The main objective of this training programme is to increase understanding of postgraduate student's about research ethics, research topic selection, experimental design, data collection procedures, statistical analysis software, intellectual property issues, how to reduce plagiarism and writing skills of thesis/review/research articles which is an essential for publishing in high impact factor journals.

Target Audience

Students (M.Sc./Ph.D), budding scientists, researcher and teachers are eligible to register and are requested to take advantage of the e-training.

Registration

The e-training will be available to 250 registered eligible candidates. Preference will be given to the candidate first come first serve basis.

The link for the online registration is : <https://forms.gle/EWkZj4swPXcoWPnn6>

Or use QR code provided here.

Registration is opened till 19th to 23th November, 12:00 O' Clock

There is no registration fee for e-training.

About the Selection

The WhatsApp group of the selected candidates will be created on 23.11.2020 and the communication regarding the e-training will be posted in the group.

Lecture through online platform will be conducted along with online interaction. The link/Id for joining the session will be communicated through WhatsApp group of selected candidates on 23 November 2020.
