The University has a long history of significant research contributions made by the well established faculties, research sections, regional stations and research farms and developed more than 275 high yielding varieties in cereals, oilseeds, pulses, vegetables and important others crops. The C.S.A agriculture university is one of the state university selected for implementation of CAAST project. Centre for Agricultural Science and Technology (CAAST-NC) is new initiative and student centric sub-component of World Bank sponsored National Agricultural Higher Education Project (NAHEP) implemented by the education division, ICAR New Delhi. The project emphasis on modern scientific education research & development in area of quality seed production, horticulture, bio-fortification, value addition, canning & packaging of the products.

ABOUT THE WEBINAR

It is matter of immense pleasure that Harvest plus value addition and bio-fortification under the CAAST-NC project, Chandra Shekhar Azad University of Agriculture & Technology, Kanpur is going to be organize webinar on “Food Quality & Policy Their Implementation in Public Distribution System”. Quality management systems are indispensable in each sector of the food industry, to ensure the safe quality food for the consumers. This system focuses on food safety, food spoilage as well as another potential food risks. Food quality is complex concept that can be assessed only in relation to food safety. To be consider safe for consumption, a food must meet legislative requirement technological criteria, transport, hygiene & handling requirement, trading condition and satisfy intended use. The quality assurance system includes prerequisites (GMP, GHP, GAP, HACCP & ISO). The objective of the webinar is to improve the quality of the product in food processing industries and impart the knowledge of entire system.
