INVITATION

Dear Esteemed Colleagues,

With immense pleasure we invite you to participate in the 6th edition of the Winter School-Training Program on "Novel Approaches in Agricultural Systems" (NAAS-6.0), scheduled to be held from 1st to 30th March 2025.

This program is meticulously crafted to equip scientists, academicians, researchers, and students with the latest knowledge and skills in advanced agricultural technologies and sustainable practices. As agriculture faces mounting challenges, ranging from climate change to resource scarcity, this training program will offer innovative solutions and foster advancements that benefit productivity and sustainability.

We look forward to your participation in this transformative learning experience. Let us work together to shape the future of agriculture and make significant contributions to global food security.

HIGHLIGHTS OF NAAS

- 30 Days of Comprehensive Training-cum-Certificate
- Expert Sessions by Renowned Agricultural Scientists
- Virtual Practical Experience and Field Demonstrations
- Networking and Collaboration Opportunities
- Enhancement of Your Biodata

Since 1941

The oldest and most prestigious registered society of practicing agriculturist from public and private institutions and the students pursuing agricultural disciplines

REGISTER NOW

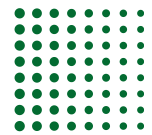

Program Objectives:

1. To empower participants with advanced knowledge and technical expertise.
2. To encourage interdisciplinary approaches to agricultural research and development.
3. To promote sustainable farming practices that ensure long-term productivity and environmental health.

Why Join NAAS

- 1. Learn from Experts:** Gain insights from leading agricultural scientists, practitioners, and academicians with years of expertise.
- 2. Comprehensive Curriculum:** The program offers a balanced mix of theoretical knowledge, practical sessions, case studies, and real-world applications.
- 3. Networking Opportunities:** Engage with like-minded professionals, researchers, and students to exchange ideas, collaborate, and build long-lasting connections.
- 4. Cutting-Edge Innovations:** Stay updated with the latest technological advancements and sustainable practices transforming agriculture.
- 5. Virtual Practical Experience Training:** Participate in interactive sessions, workshops, and field demonstrations designed to enhance practical skills.

Benefits of Attending:

- **Skill Enhancement:** Improve your proficiency in advanced agricultural techniques.
- **Career Boost:** Gain an edge in academic, research, and professional domains.
- **Research Opportunities:** Explore potential areas for innovative projects and studies.
- **Certification:** Receive a prestigious certificate that validates your participation and acquired skills.

PROGRAM SCHEDULE OVERVIEW

Detailed 4-Week Module Breakdown

Novel Approaches in Agricultural Systems (NAAS)
“A Hundred Lecture Series of Winter School”
(Scheduled from 1st to 30th March – 2025)

Section-I: Crop Production

Lecture Topics

1. Traditional practices of soil health improvement
2. Improving soil health by integrated nutrient management Importance of mulching, green maturing and composting for sustainable agriculture development
3. Soil improvement practices for increasing beneficial microbes in soil
4. Low-cost soil preparation for cereal crop production
5. Improved agronomical practices of crop production in the era of climate change
6. Improving pulse crop production employing strategic agronomical practices
7. Integrated farming systems for sustainable agriculture development
8. Package and practices of oil yielding crop production
9. Integrated nutrient management in soil-less cultivation
10. Importance of protected cultivation in the era of global warming for national food security
11. Promoting nutria-dense crops
12. Package and practices of directed seeded rice cultivation
13. Enhancing crop productivity under agro-forestry system
14. Package and practices of under-utilized pseudo-cereal production for agricultural sustainability and nutritional security
15. Improved production practices of tuber crop cultivation
16. Improved production practices of Solanaceous vegetable production
17. Water – saving crop production technology: Exploitation of drip and sprinkler irrigation in crop production
18. Protected cultivation of high – cost vegetables
19. Low –cost vegetable nursery establishment
20. Promotion of potential vegetable crops for sustainable agriculture development and global nutritional security
21. Integrated weed management in cereal crops
22. Integrated weed management in pulse crops
23. Integrated weed management in oil yielding crops
24. Promotion of minor fruits cultivation for nutritional security
25. Promotion of local crop varieties for cultivation
26. Integrated nutrient management in pulses
27. Integrated nutrient management in cereal crops
28. Integrated nutrient management in oil yielding crops
29. Standardization of agronomical practices for cash crop production
30. High –tech fruit crop nursery establishment

Section-II: Crop Protection

Lecture Topics

31. Integrated insect – pest management in vegetable crops
32. Insect – pest management in vegetable crops under protected cultivation
33. Integrated insect – pest management in cereal crops
34. Integrated insect – pest management in pulses
35. Integrated insect – pest management in oil yielding crops
36. Integrated insect – pest management in fruit crops
37. Fungal disease management in vegetable crops
38. Fungal disease management in vegetable crops under protected cultivation
39. Fungal disease management in cereals
40. Fungal disease management in pulses
41. Fungal disease management in cash crops
42. Fungal disease management in oil yielding crops
43. Fungal disease management in fruit crops
44. Bacterial disease management in vegetable crops
45. Bacterial disease management under protected cultivation
46. Bacterial disease management in cereals
47. Bacterial disease management in pulses
48. Bacterial disease management in oil yielding crops
49. Bacterial disease management in cash crops
50. Bacterial disease management in fruit crops
51. Viral disease management in vegetable crops
52. Viral disease management in vegetable crops under protected cultivation
53. Viral disease management in cereals
54. Viral disease management in pulses
55. Viral disease management in cash crops
56. Viral disease management in oil yielding crops
57. Viral disease management in fruit crops

Section-III: Technological Inventions in Agricultural Systems

Lecture Topics

58. Propagation opportunities in horticultural crops
59. Plant tissue cultural approaches in the commercialization of high - value horticultural and aromatic plants
60. Biotechnological inventions and genetic exploitation of horticultural crops
61. Achievement and scope of molecular breeding in horticultural crops

PROGRAM SCHEDULE OVERVIEW

Detailed 4-Week Module Breakdown

Novel Approaches in Agricultural Systems (NAAS)

“A Hundred Lecture Series of Winter School”

(Scheduled from 1st to 30th March – 2025)

Lecture Topics

62. Biofortification in Cereal Crops to elevate malnutrition
63. Genes, QTLs and Markers involved in the biotic stress tolerance in major cereal crops
64. Genes, QTLs and Markers involved in the abiotic stress tolerance in major cereal crops
65. Scope of varietal improvement using molecular breeding
66. Transgenic approaches in the development of resistance against biotic and abiotic threats in cereal crops
67. Transgenic approaches in the development of resistance against biotic and abiotic threats in Pulse crops
68. Transgenic approaches in the development of resistance against biotic and abiotic threats in oil yielding crops
69. Transgenic approaches in the development of resistance against biotic and abiotic threats in Horticultural Crops
70. Scope and achievement of Biofortification in horticultural crops
71. Molecular farming for sustainable agriculture development
72. Speed Breeding Approaches in genetic exploitation of horticultural crops
73. Speed Breeding Approaches in genetic exploitation of Cereal crops
74. Speed Breeding Approaches in genetic exploitation of pulse crops
75. Speed Breeding Approaches in genetic exploitation of Oil yielding crops
76. Role of Drone and AI – based technology in the Acceleration of Agricultural Production and sustainable development

Section–IV: Natural Farming and Sustainable Agriculture Development

Lecture Topics

77. Basic inputs of natural farming
78. Restoration of natural systems to accelerate natural farming system
79. Soil improvement and agronomical practices for natural farming
80. Scope and importance of the selection of suitable crop cultivars for natural farming
81. Processing and value addition in natural farming produce
82. Self – employment in the export of value-added natural farm products
83. Employment Opportunities to the unemployed rural youth in the processing and value addition sector of the natural farming produce commercialization
84. Soil health management

Section-V: Technological Advancement in Animal Science and Dairy Sector

Lecture Topics

85. Scope and importance of indigenous cow breeds
86. Technological inventions in the dairy sector
87. Package and practices of fodder production for dairy sector
88. Animal health management
89. Processing and value addition in the milk and dairy products
90. Suitable buffaloes breeds for Commercial dairy sector in India
91. Poultry business: A Complete package of self-employment for rural youth
92. Feed Industries in poultry business: An employment opportunities
93. Gouty and meat producing animals: Breeds and the management for commercial exploitation
94. Tools and techniques of the meat preservation, processing and export
95. Subsidy and government promotion in the field of dairy sector
96. Feed and fodder management for gouty: Employment opportunities for the unemployed youth
97. Fisheries Sector in India: Technological employment for revisualization of Fish production
98. Fish feed production: AN employment opportunity
99. Preservation and export technology for processed and unprocessed fish
100. Comprehensive revision of the 100-lecture series training
